

### The legend of Octopussy

Coming straight ahead from the magic and fantastic universe of Jules Verne, Octopussy, the huge colorful octopus, hangs on the Nautilus. Out of the sea, the Octopussy waves, with curiosity and grace, its huge transparent tentacles that change its colours right above the head of the spectators. Leading the way to their submarine, the deep-sea divers of another time progress slowly, amazed. During the ambulation they spray with kilometers of ribbons the spectators. This extraordinary procession gives a hint of magic to children and adults, both charmed by the colours and the peaceful movements of the Octopussy and its acrobat while the bubbles follow their appearance.
